

Environmental, Health and Safety Topics (standard set)

1. Introduction

- 1.01 General country information and legal system
- 1.02 Authorities
- 1.03 Enforcement of EHS and Product Compliance regulations
- 1.04 Access to environmental information

2. General Environmental Liability

- 2.01 General environmental obligations and responsibilities
- 2.02 Environmental training
- 2.03 Environmental fees
- 2.04 Environmental insurance
- 2.05 Environmental fees
- 2.06 Environmental reporting
- 2.07 Environmental impact assessment and environmental audits
- 2.08 Soil protection requirements
- 2.09 General environmental permits
- 2.10 Building permit
- 2.11 Business licensing / operational permits
- 2.12 Energy efficiency of building and processes / energy audit

3. Substances Management

- 3.01 Substances classification systems

- 3.02 Substance / chemical product registration
- 3.03 MSDS
- 3.04 Substances packaging and labelling requirements
- 3.05 Restrictions for ozone depleting substances (ODS)
- 3.06 Restrictions on the use of substances / chemical products (general)
- 3.07 Restrictions on the use of specific substances: POPs, precursors, asbestos, heavy metals and toxic substances
- 3.08 Restrictions on the import and export of chemical substances

4. Hazardous Materials / Dangerous Goods

- 4.01 Handling and storage of dangerous goods / hazardous materials
- 4.02 Overground and underground storage tanks
- 4.03 Permits and licenses
- 4.04 Road transport of dangerous goods: requirements (including packaging and labelling), restrictions, permits and notifications.
- 4.05 Road transport of dangerous goods: safety advisers.
- 4.06 Road transport of dangerous goods: vehicle requirements. Training of drivers.

5. Waste Management

- 5.01 Classification of waste
- 5.02 Waste generation and storage requirements
- 5.03 Waste generation and disposal limits
- 5.04 Waste record-keeping and notification requirements
- 5.05 Extended producer responsibility
- 5.06 Hazardous waste generation and handling

- 5.07 Generation and handling of special types of waste: WEEE, packaging, hazardous waste, used lamps, batteries and accumulators, medical waste
- 5.08 Waste transportation (national and international)

6. Air Protection

- 6.01 Emission sources: classification and definition
- 6.02 Controlled substances
- 6.03 Registration of air polluters
- 6.04 Air emission permits
- 6.05 Air emission limits
- 6.06 Air emission charges and fees
- 6.07 Inventory of air emission sources
- 6.08 Operation of stationary air emission sources
- 6.09 Self-assessment and self-monitoring requirements
- 6.10 Boiler and heating installations
- 6.11 Mobile emission sources
- 6.12 Record-keeping and notification
- 6.13 Emissions trading schemes
- 6.14 Noise pollution
- 6.15 Ambient radiation
- 6.16 Ambient vibration
- 6.17 Light and odour restrictions
- 6.18 Greenhouse gas emissions

7. Water Protection

- 7.01 Water use (wastewater discharge) permit / water use limits
- 7.02 Water use fees

- 7.03 Water use record-keeping and notification
- 7.04 Water use restrictions and self-monitoring
- 7.05 Protection of drinking water sources
- 7.06 Rain and drainage water management
- 7.07 Ground water management

8. Occupational Safety Management

- 8.01 General occupational safety requirements
- 8.02 Workplace risk assessment (Attestation)
- 8.03 Self-monitoring of compliance with occupational safety rules
- 8.04 Female workers, disabled workers, young workers, night workers
- 8.05 Drivers
- 8.06 Occupational safety specialists and OHS service
- 8.07 Occupational safety training and safety instructions
- 8.08 External contractor management

9. Safety of Processes

- 9.01 General safety requirements
- 9.02 Works at height
- 9.03 Machinery, tools and equipment safety
- 9.04 Metal cutting and metalworking
- 9.05 Welding works
- 9.06 Personal protective equipment
- 9.07 Electrical safety. Electrical installations and grounding
- 9.08 Industrial vehicle safety
- 9.09 Lifting equipment, loading and unloading works
- 9.10 Pressure equipment

- 9.11 Explosive atmospheres
- 9.12 Works with gas hazard (confined spaces)
- 9.13 Occupational health and safety signs

10. Occupational Health Management

- 10.01 Occupational health: general
- 10.02 Occupational exposure: general
- 10.03 Occupational exposure: noise
- 10.04 Occupational exposure: vibration
- 10.05 Occupational exposure: chemical and biological substances
- 10.06 Occupational exposure: heat
- 10.07 Occupational exposure: infra-red
- 10.08 Occupational exposure: radiation
- 10.09 Occupational exposure: carcinogens
- 10.10 Harmful and hazardous types of work
- 10.11 Accident investigation, reporting and record-keeping
- 10.12 Medical examination of workers
- 10.13 Self-monitoring of occupational health conditions
- 10.14 Working conditions: lighting, microclimate, sanitary facilities, resting time
- 10.15 First aid facilities and first aid training
- 10.16 Video-terminal (display) and copy equipment safety

11. Fire Safety

- 11.01 General fire safety requirements
- 11.02 Fire prevention requirements
- 11.03 Fire alarms and fire fighting equipment
- 11.04 Safety of buildings and evacuation

Do it right the first time!

PRAVSKY 
CONSULTING

PRODUCT COMPLIANCE, ENVIRONMENT
HEALTH AND SAFETY

12. Major hazard facilities

- 12.01 General requirements, classification, identification and registration
- 12.02 Safety declaration
- 12.03 Staff training and qualification
- 12.04 Compulsory insurance
- 12.05 Accident investigation
- 12.06 Self-monitoring and prevention measures
